

Scott Corry

Lawrence University
Department of Mathematics
711 E. Boldt Way – SPC 24
Appleton, WI 54911

(920)832-7287
scott.corry@lawrence.edu
<http://faculty.lawrence.edu/corrys>

Employment

- Professor of Mathematics, Lawrence University, 2019-
- Associate Professor of Mathematics, Lawrence University, 2013-19
- Assistant Professor of Mathematics, Lawrence University, 2007-13

Education

- Ph.D. in mathematics, University of Pennsylvania, 2007 (Advisor: Florian Pop)
- B.A. in mathematics, Reed College, 2001

Honors, Awards, Short-term Positions

- Director of Freshman Studies Program, Lawrence University, 2014-16
- Young Teacher Award, Lawrence University, 2011
- Visiting Fellow, Isaac Newton Institute for Math. Sciences, July-August 2009
- SAS Dissertation Fellow, University of Pennsylvania, 2006-2007
- Eugenio Calabi Scholar, UPenn Department of Mathematics, 2002-2007
- NSF Graduate Research Fellow, 2002-2006
- Dean's Scholar, University of Pennsylvania, 2005
- Good Teaching Awards, UPenn Dept. of Mathematics, Fall 2004, Spring 2005
- Phi Beta Kappa, Reed College, 2001
- Barry M. Goldwater Scholar, 2000

Teaching

- Courses at Lawrence: Calculus I, II, III, Differential Equations with Linear Algebra, Applied Combinatorics, Probability, Foundations of Algebra, Foundations of Analysis, Linear Algebra, Topics in Geometry, Rings and Fields, Topics in Analysis, Topics in Algebra & Combinatorics, Number Theory, Freshman Studies I, II
- Tutorials at Lawrence: Elementary Number Theory, Commutative Algebra, Algebraic Curves, Putnam Problems, Linear Algebra, Quantum Computing, *Gödel, Escher, Bach*

- Independent Studies at Lawrence: Area in Euclidean Geometry, Riemann Surfaces, Graphs and Riemann Surfaces, Differential Geometry, Group Theory, Combinatorial Game Theory, Group Theory and Physics, Primes of the Form $x^2 + ny^2$, Galois Theory, Symmetry in Quantum Mechanics, Symmetries of Finite Graphs, Analytic Number Theory, Algebraic Geometry, The Kronecker-Weber Theorem, Linear Programming & Economic Analysis, Module Theory, Cryptography on Graphs, Topics in Linear Algebra, Gauss's Theory of Surfaces, Model Categories, Mathematical Statistics, Chip-firing on Complexes, Quantum Field Theory, A Survey of Ramsey Theory

Books

- *Divisors and Sandpiles: An Introduction to Chip-Firing* (with D. Perkinson), American Mathematical Society, 2018.
- *Symmetry and Quantum Mechanics*, Monographs and Research Notes in Mathematics, Chapman & Hall / CRC, 2017.

Publications

- *Counting arithmetical structures on paths and cycles* (with B. Braun, H. Corrales, L.D. García Puente, D. Glass, N. Kaplan, J.L. Martin, G. Musiker, C.E. Valencia), Discrete Mathematics, **341**, No. 10 (2018), 2949-2963.
- *Maximal harmonic group actions on finite graphs*, Discrete Mathematics, **338**, No. 5 (2015), 784-792.
- *Harmonic Galois theory for finite graphs*, in "Galois-Teichmüller Theory and Arithmetic Geometry" (H. Nakamura, F. Pop, L. Schneps, A. Tamagawa eds.), Advanced Studies in Pure Mathematics, **63** (2012), 121-140.
- *Genus bounds for harmonic group actions on finite graphs*, Int. Math. Res. Notices, **2011**, No. 19 (2011), 4515-4533.
- *Galois covers of the open p -adic disc*, manuscripta math., **131**, No. 1-2 (2010), 43-61.
- *The pro- p Hom-form of the birational anabelian conjecture* (with F. Pop), J. Reine Angew. Math (Crelle's Journal), **628** (2009), 121-127.
- *A Hom-form of the pro- p birational anabelian conjecture*, extended abstract of talk at the Oberwolfach workshop "Arithmetic and Differential Galois Groups," published in Mathematisches Forschungsinstitut Oberwolfach Report No. 26/2007.
- *Arithmetic and geometry of the open p -adic disc*, Ph.D. dissertation, University of Pennsylvania, May 2007.
- *Hilbert functions of finite group orbits: abelian and metacyclic groups*, Senior thesis, Reed College, May 2001.

Talks (since 2009)

- *Genus Bounds for Harmonic Group Actions on Finite Graphs*, December 2019 Topology, Analysis, and Geometry Seminar, Central Michigan University

- *Chip-firing Games on Graphs*, March 2014
Colloquium, St. Norbert College
- *Chip-firing Games on Graphs*, February 2014
Science Hall Colloquium, Lawrence University
- *Harmonic Group Actions, Genus Bounds, and Combinatorial Maps*, January 2014
Special Session on Tropical and Nonarchimedean Analytic Geometry at the AMS/MAA Joint Meetings, Baltimore
- *Harmonic Group Actions on Finite Graphs*, July 2013
Generalizations of Chip-Firing and the Critical Group, American Institute of Mathematics, Palo Alto
- *Graph-theoretic Hurwitz Groups*, March 2013
Combinatorics Seminar, University of Minnesota
- *Finite Graphs and Riemann Surfaces: Hurwitz groups and graphs*, November 2012
Colloquium, Reed College
- *Symmetry: an example from graph theory*, November 2011
Science Hall Colloquium, Lawrence University
- *Harmonic Galois theory for finite graphs*, February 2011
Galois Seminar, University of Pennsylvania
- *Galois branched covers of finite graphs*, October 2010
Galois-theoretic Arithmetic Geometry, International Inst. for Advanced Study (Kyoto)
- *The pro-p Hom-form of the birational anabelian conjecture*, August 2009
Anabelian Seminar, Isaac Newton Institute for Math. Sciences (Cambridge, UK)
- *Galois Theory and Rational Points on Curves*, April 2009
Colloquium, University of Wisconsin – Oshkosh

Conferences (since 2009)

- AMS/MAA Joint Meetings, San Diego, January 2018
- Topological Data Analysis: Theory and Applications, Macalester College, June 2017
- AMS/MAA Joint Meetings, Atlanta, January 2017
- Sandpile Groups, BIRS-CMO (Oaxaca), November 2015
- AMS/MAA Joint Meetings, Baltimore, January 2014
- Generalizations of Chip-Firing and the Critical Group, American Institute of Mathematics, July 2013
- Galois-theoretic Arithmetic Geometry, IAS (Kyoto), October 2010
- Introductory Workshop: *Non-Abelian Fundamental Groups in Arithmetic Geometry*, Isaac Newton Institute for Math. Sciences (Cambridge, UK), July 2009

Professional Memberships

- American Mathematical Society (AMS)
- Association for Women in Mathematics (AWM)

Professional Service

- Referee for journals such as Advances in Applied Mathematics, Ars Mathematica Contemporanea, Discrete Mathematics, and European Journal of Combinatorics.
- Reviewer for Zentralblatt MATH
